SUMMARY

A hard-working student with skill of programming to deliver great value to the customers as well as the company through efficient website development. A sharp and sincere person with great commitment to work, good in building relationship and working with teams.

EDUCATION

Bachelor of Science in Computer Science   *Spring 2021*

University of Houston - Houston, Tx (Cum GPA: **3.94**)

Associate of Science in Computer Science   *Spring 2018*

Houston Community College - Houston, Tx

RELEVENT COURSEWORK

- Data Structure / Algorithms
- NodeJS / ReactJS
- MySQL/MongoDB
- Statistics / Discrete Mathematics

PROJECTS

- Recipe App (Language of Implementation: ReactJS): Recipe app is a web-based application. It uses the API provided by edamam.com to fetch the data from the server to the client based on the query input by users and renders the list of ten recipes to the dom. (source code on GitHub)
- Weather App (Language of Implementation: NodeJS, Express): Weather app is a web-based application build with Nodejs and Express library. The app fetches the data from Openweathermap.com API using Axios, which is a promise-based HTTP client for the browser. (source code on GitHub)
- Client/Server Simulation (Language of Implementation: C++, Sockets): Client/Server simulation is a school project written in C++. It simulates the communication between Client and Server, where Server is open with a port number and Client needs to make a request through that port number to exchange information.

EXPERIENCE

Cricket Wireless Store   *May- Aug 2017*

Sales Associate

- Educated customers on cell phones and plans to aid in decision of purchase based on individual needs and demonstrating how to utilize new cell phones.
